History of construction surveying. The nearly perfect squareness and north-south orientation of the Great Pyramid of Giza, built c. 2700 BC, affirm the Egyptians' command of surveying. [citation needed]A recent reassessment of Stonehenge (c.2500 BC) suggests that the monument was set out by prehistoric surveyors using peg and rope geometry.; In the sixth century BC geometric based techniques ...

### **Construction Layout Basics**

Construction Staking, also known as a Site Layout Survey, is the process of interpreting construction plans and marking the location of proposed new structures such as roads or buildings. Construction staking is performed to ensure a project is built according to engineering design plans.

### **Construction Survey/Layout | Topcon Positioning Systems, Inc.**

Construction staking is the process of interpreting construction plans and marking the location of proposed structures or improvements on the property. A surveyor can, for instance, mark the corners of a proposed building, the edge of a future road or location of utilities to be constructed.
