Gastroparesis

Personal Stories

Your esophagus is the tube that carries food from your mouth to your stomach.

Gastroesophageal reflux disease (GERD) happens when a muscle at the end of your esophagus does not close properly. This allows stomach contents to leak back, or reflux, into the esophagus and irritate it. [Read more on](#)

GERD and Gastroparesis Flashcards | Quizlet

Gastroparesis is a term used to describe slowed stomach emptying. In fact, it is also commonly called delayed gastric emptying or simply GP for short. This means that food entering the stomach stays there for extended periods of time before moving along to the rest of the digestive tract.
