**Sum Up Answers**  
If A is a vector, then sum(A) returns the sum of the elements.. If A is a matrix, then sum(A) returns a row vector containing the sum of each column.. If A is a multidimensional array, then sum(A) operates along the first array dimension whose size does not equal 1, treating the elements as vectors. This dimension becomes 1 while the sizes of all other dimensions remain the same.
