of the triangle is greater than 90° , while in an acute triangle, all of the angles are less than 90° , as shown below. Triangle facts, theorems, and laws. It is not possible for a triangle to have more than one vertex with internal angle greater than or equal to 90° , or it would no longer be a triangle.

Everything you need to know about a polygon doesn't necessarily fall within its sides. You may need to find exterior angles as well as interior angles when working with polygons: Interior angle: An interior angle of a polygon is an angle inside the polygon at one of its vertices. Angle Q is an interior angle [...]
